DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-40, drawn to computer executable instructions supporting interactions between objects via interfaces and methods, classified in class 709, subclass 332.
 - II. Claims 41-48, drawn to a computer operating system capable of loading objects into working memory at run-time, classified in class 711, subclass 159.
 - III. Claims 49-52, drawn to a computer system supports object communication via proxy objects, classified in class 709, subclass 315.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as using proxy objects to transferring messages between objects located in different address spaces. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
